WORK EXPERIENCE

Raga AI

Senior Software Engineer, Frontend

San Francisco Bay Area, Remote

Dec 2023 – Present

- Recognized as Most Valuable Performer (MVP, Q1 2026, and Employee of the Month, January 2026, for leading the architectural design and delivery of a high-impact healthcare administration platform.
- Led the development of a healthcare administration platform, building core features including patient intake, scheduling, insurance validation/verification, billing, and analytics dashboards.
- Delivered two enterprise-grade platforms from scratch, driving AI agent deployment and LLM evaluation at scale. Recognized for exceptional performance with "Employee of the Month (November 2024)" and "Champion of User Experience (Q2 2024)" awards.
- Led the development of a healthcare administration platform, building core features including patient intake, scheduling, insurance validation/verification, billing, and analytics dashboards using React, TypeScript, and Tailwind CSS. Architected a scalable component library with Storybook documentation and implemented role-based access control with white-labelling support.
- Led the frontend development of Canvas, a comprehensive web platform for creating, managing, and deploying AI agents using a visual drag-and-drop interface.
- Led frontend development of Catalyst, a secure, scalable platform for evaluating and optimizing LLMs, tailored for enterprise use cases (HIPAA, SOC-2 compliant).

Scale AI

Frontend AI Consultant – Freelance

San Francisco Bay Area, Remote

Apr 2025 – June 2025

- Contributed to training and evaluation of LLMs by validating AI model outputs via a proprietary frontend interface.
- Reviewed prompts, structured responses, and provided feedback to fine-tune GenAI behaviour across domains.
- Evaluated and reviewed AI-generated code for accuracy, readability, accessibility, and UI/UX quality, ensuring adherence to real-world standards.

Qwikskills

Senior UI Developer,

Bengaluru, Remote

Apr 2022 – Nov 2023

- Led the end-to-end frontend development of QwikSkills' enterprise offering, a scalable platform for organizations to upskill teams via cloud labs, assessments, and certification programs.
- Designed and implemented a role-based access control (RBAC) admin panel to manage enterprise accounts, users, subscription plans, and learning data.
- Built reusable, themeable design systems using Material UI and SCSS, maintaining visual consistency and performance across large-scale views.
